## ACTIVAL X-331

---

### Description

Reactive wetting and dispersing agent; used in SMC, excellent dispersion in WB system for fillers and pigments

### Key Features and Benefits

- No organic reactivity Hydrophilic modifier
- Non-ionic silicone functionality and, therefore, very hydrolytically stable
- Easy to use and handle
- 100 percent actives

### Typical Physical Properties

Appearance	Clear amber liquid
Viscosity at 25 °C	25- 50 cSt
Specific Gravity at 25 °C	1.076
Freezing Point	18 °F to be mentioned in °C
Flash Point (ASTM D93)	189 °F / 87 °C

Typical Properties are average data and are not to be used as or to develop specifications.

### Product Safety, Handling and Storage

Customers should review the latest Safety Data Sheet (SDS) and label for product safety information, safe handling instructions, personal protective equipment if necessary, emergency service contact information, and any special storage conditions required for safety. Inoova Material Science (IMS) maintains an around-the-clock emergency service for its products. SDS are available upon request from any IMS representative. For product storage and handling procedures to maintain the product quality within our stated specifications, please review Certificates of Analysis, which are available in the Order Center. Use of other materials in conjunction with IMS products (for example, primers) may require additional precautions. Please review and follow the safety information provided by the manufacturer of such other materials.

## Limitations

Customers must evaluate Actival X331 and make their own determination as to fitness of use in their particular applications.
